

HOW TO...

MAKE LIQUID MILK WITH POWDERED MILK!

Recipe for 1 quart:

- 1. Pour 3 & 3/4 cups cold water into a pitcher**
- 2. Add 1 pouch (3.2oz) powdered milk**
- 3. Stir continuously until combined**
- 4. Refrigerate in a sealed container**

Pro Tip!

You can mix smaller portions and keep excess powdered milk in a sealed container to mix at a later date!

Why powdered milk?

Powdered milk is made by removing the water from cow's milk until it resembles a powder.

Powdered milk is just as nutritious as fluid milk. It's a good source of calcium, vitamin D, and protein.

Powdered milk has a lower cost and a longer shelf life than fluid milk. Meaning you can enjoy more of it for longer!
